Editorial Board

Australia:	Professor E. J. Anderson, University of New South Wales, Sydney
	Dr B. Jenney, Monash University, Melbourne
Belgium:	Professor L. F. Gelders, Centre for Industrial Management, Leuven
Canada:	Professor G. Abdulnour, Université du Québec à Trois Rivières
France:	Professor F. B. Vernadat, Laboratoire de Génie Industriel et de Production Mécanique, Université de Metz
Finland:	Professor H. E. Andersin, Helsinki University of Technology
Germany:	Professor Dr-Ing H. Bullinger, Fraunhofer-IAO, Stuttgart
	Professor H. Dyckhoff, RWTH Aachen
India:	Dr S. Sahu, Indian Institute of Technology, Kharagpur
Israel:	Professor E. Dar-El, Technion-Israel Institute of Technology, Haifa
	Professor D. Sipper, Tel Aviv University
Italy:	Professor A. Villa, Torino Polytechnic
Japan:	Professor M. Yamamoto, Hosei University, Tokyo
	Professor H. Ohta, Osaka Prefecture University
The Netherlands:	Professor Dr J. W. Bertrand, Technische Universiteit Eindhoven
	Dr E. M. Goldratt, Dijkstraat, VG Roelofarendsveen
Poland:	Professor Jan Weglarz, Poznan University of Technology
PR China:	Professor W. S. Lau, Hong Kong Polytechnic University
	Professor S. C. Wang, Beijing University of Aeronautics and Astronautics
Singapore:	Professor A. Y. C. Nee, National University of Singapore
South Korea:	Dr H. Hwang, Korea Advanced Institute of Science and Technology
Sweden:	Professor R. W. Grubbström, Linköping Institute of Technology
United Kingdom:	Professor C. B. Besant, Imperial College of Science and Technology, London
	Professor K. Case, Loughborough University
	Professor N. N. Z. Gindy, Nottingham University
	Professor R. H. Hollier, UMIST, Manchester
	Professor J. E. L. Simmons, Heriot-Watt University, Edinburgh
USA:	Professor J. F. Bard, The University of Texas at Austin
	Professor W. L. Berry, Ohio State University, Columbus
	Dr T.-C. Chang, Purdue University, West Lafeyette, IN
	Dr P. Dewhurst, University of Rhode Island
	Professor E. A. Elsayed, Rutgers State University, Piscataway, NJ
	Professor M. J. Magazine, University of Cincinnati
	Professor S. A. Melnyk, Michigan State University, East Lansing
	Professor D. C. Montgomery, Arizona State University, Tempe
	Professor D. C. Whybark, University of North Carolina, Chapel Hill
	Dr D. L. Woodruff, The University of California at Davis
Founding Editor:	Professor N. A. Dudley, Emeritus Professor, University of Birmingham, UK

International Journal of Production Research

Volume 39, 2001—CONTENTS

No. 1 10 January 2001

A hierarchical clustering methodology based on genetic programming for the solution of simple cell-formation problems. C. Dimopoulos and N. Mort 1

NURBS machining and feed rate adjustment for high-speed cutting of complex sculptured surfaces. H.-T. Yau and M.-J. Kuo 21

Quality improvement practices and the effect on manufacturing firm performance: evidence from Mexico and the USA. E. E. Adam Jr, B. E. Flores and A. Macias 43

Product and employee development in advanced manufacturing: implementation and impact. S. E. Fawcett and M. B. Myers 65

The G-group heuristic to solve the multi-product, sequencing, lot sizing and scheduling problem in flow shops. J. Ouenniche and F. F. Boctor ... 81

A Fuzzy Quality Function Deployment (FQFD) model for deriving optimum targets. L. V. Vanegas and A. W. Labib 99

Core and cavity generation method in injection mould design. M. W. Fu, J. Y. H. Fuh and A. Y. C. Nee 121

Performability of FMS based on stochastic process models. J. Rupe and W. Kuo 139

Announcement 157

No. 2 20 January 2001

Special Issue: Modelling, specification and analysis of manufacturing systems

Guest Editorial. F. Vernadat and X.-L. Xie 159

Capacity analysis for mixed technology production: evaluating production ramp resource modifications via distributed simulation. J. M. Couretas, B. P. Zeigler, I. Subramanian and H. Sarjoughian 163

On the explicit modelling of systems of human resources. R. H. Weston, P. E. Clements, D. N. Shorter, A. J. Carrott, A. Hodgson and A. A. West 185

Generalized queueing network analysis of integrated supply chains. N. R. Srinivasa Raghavan and N. Viswanadham 205

A Petri net based design engine for manufacturing systems. A. Zimmermann, J. Freiheit and A. Huck 225
Modelling and simulation of manufacturing systems with first-order hybrid Petri nets. F. Balduzzi, A. Giua and C. Seatzu 255
Deadlock prevention policy based on Petri nets and siphons. Y. Huang, M. Jeng, X. Xie and S. Chung 283
A multi-class approximation technique for the analysis of kanban-like control systems. B. Baynat, Y. Dallery, M. Di Mascolo and Y. Frein... ... 307
Synthesis of control implementation for discrete manufacturing systems. J. Zaytoon and V. Careé-Ménétrier 329
Stable supervisory control of flexible manufacturing systems with fixed supply and demand rates. P. C. Y. Chen and W. M. Wonham 347
A backward algorithm for computing optimal controls for single-stage hybrid manufacturing systems. Y. Wardi, C. G. Cassandras and D. L. Pepyne 369
Queueing network modelling and lead time compression of pharmaceutical drug development. N. Viswanadham and Y. Narahari 395

No. 3 15 February 2001

CONDENSE: a concurrent design evaluation system for product design. C.-H. Chen, L. G. Occeña and S. C. Fok 413
Pre-processing approach for cutter interference removal. A. Hatna and R. J. Grieve 435
MRP performance effects due to lot size and planned lead time settings. S. T. Enns 461
Disassembly sequence plan generation using a branch-and-bound algorithm. A. Güngör and S. M. Gupta 481
Rule of thumb heuristics for configuring storage racks in automated storage and retrieval systems design. C. J. Malmborg 511
Total quality management: an empirical test for mediation effect. D. C. K. Ho, V. G. Duffy and H. M. Shih 529
Classification of spot welds using power factor time profiles. J. S. Ivy and S. M. Pollock 549
A framework for teaching and training in the Enterprise Resource Planning (ERP) era. A. Shtub 567
Announcement 577

No. 4 10 March 2001

Selection of circulatory loops for patrol vehicles operating in a network. C.-H. HU and P. J. EGBELU 579

Batch process schedule optimization under parameter volatility. Y. G. LEE and M. F. MALONE 603

A distributed multi-agent environment for product design and manufacturing planning. J. SUN, Y. F. ZHANG and A. Y. C. NEE 625

Optimal machining conditions with costs of quality and tool maintenance for turning. Y. V. HUI, L. C. LEUNG and R. LINN 647

A conceptual view on data-model driven reverse engineering. V. BORJA, J. A. HARDING and R. BELL 667

Mathematical modelling and heuristic approaches to operation scheduling problems in an FMS environment. C. LOW and T.-H. WU 689

Application of AI to AGV control—agent control of AGVs. A. WALLACE 709

Monitoring manufacturing system availability. L. R. LAMBERSON and G. S. WASSERMAN 727

Simulating alternative production policies with sequence-dependent costs. E. PRATSINI, N. B. MARKS and T. C. KREHBIEL 737

A stochastic model of a reconfigurable manufacturing system—Part 3: Optimal selection policy. ZHAO X., WANG J. and LUO Z. 747

Machine vision assisted characterization of machined surfaces. M. GUPTA and S. RAMAN 759

Solving resource contention problem in FMS using Petri nets and a rule-based approach. P. K. JAIN 785

No. 5 20 March 2001

Economic design of process adjustment for on-line control. M.-C. WANG and J. YUE 809

Finite-capacity production planning algorithms for a semiconductor wafer fabrication facility. K. HORIGUCHI, N. RAGHAVAN, R. UZSOY and S. VENKATESWARAN 825

Comparing the effectiveness of workload balancing objectives in FMS loading. N. KUMAR and K. SHANKER 843

A procedure for the application of product modelling. L. HVAM 873

Effectiveness of planning and control systems: an empirical study of US and Japanese firms. C. SHEU and J. G. WACKER 887

Tool replacement policies for a machining centre producing multiple types of products with distinct due dates. Y.-C. CHOI and Y.-D. KIM 907

Combined parameter and tolerance design optimization with quality and cost. A. JEANG 923

Machine loading problem of FMS: a fuzzy-based heuristic approach. N. K. VIDYARTHI and M. K. TIWARI 953
Real-time tool wear condition monitoring in turning. X. LI 981
Sequential inspection for SPC-quarantined production. T. S. VAUGHAN 993
Generating interpretable fuzzy rules for adaptive job dispatching. K. K. LEE, W. C. YOON and D. H. BAEK 1011
Strategies for implementing aesthetic factors in product designs. M. YOSHIMURA and H. YANAGI 1031
Book reviews 1051

No. 6 15 April 2001

Theory of constraints — a status report. J. H. BLACKSTONE JR 1053
Dealing with design options in the optimization of manufacturing systems: an evolutionary approach. J. L. PARIS, L. TAUTOU-GUILLAUME and H. PIERREVAL 1081
Integrated and concurrent approach for compound sheet metal cutting and punching. S. Q. XIE, Y. L. TU, J. Q. LIU and Z. D. ZHOU 1095
A stochastic model of a reconfigurable manufacturing system—Part 4: Performance measure. ZHAO X., WANG J. and LUO Z. 1113
On-line optimization of quality in a manufacturing system. K. K. CHAN and T. A. SPEDDING 1127
Application of new fuzzy-weighted average (NFWA) method to engineering design evaluation. L. V. VANEGAS and A. W. LABIB 1147
Activity-Based Throughput Management in a manufacturing company. M. GUPTA 1163
Configuring layout in unidirectional loop manufacturing systems. S.-D. LEE, K.-H. HUANG and C.-P. CHIANG 1183
Modelling and evaluating product end-of-life options. G. ERDOS, T. KIS and P. XIROUCHAKIS 1203
Simulation analysis of dispatching rules for an automated interbay material handling system in wafer fab. J. T. LIN, F.-K. WANG and P.-Y. YEN 1221
Optimizing tool selection. T. LIM, J. CORNEY, J. M. RITCHIE and D. E. R. CLARK 1239
The strategic role of manufacturing. V. GILGEOUS 1257
Setting planned job release times in stochastic assembly systems with resource constraints. D. SONG, C. HICKS and C. F. EARL 1289
Book review 1303

No. 7 10 May 2001

On the producibility of composite position tolerance specifications for patterns of holes. S. V. RANADE, E. A. LEHTIHET and T. M. CAVALIER ... 1305

Real-time deadlock-free control strategy for single multi-load automated guided vehicle on a job shop manufacturing system. F.-H. LIU and P.-C. HUNG 1323

Resource-constrained project scheduling: an evaluation of adaptive control schemes for parameterized sampling heuristics. A. SCHIRMER 1343

Cutting path generation of the Stewart-Platform-Based Milling Machine using an end-mill. D. SHAW and Y.-S. CHEN 1367

Workload control of human resources to improve production management. L. FRANCHINI, E. CAILLAUD, P. NGUYEN and G. LACOSTE 1385

Manufacturing batch size and ordering policy for products with shelf lives. M. R. CHOWDHURY and B. R. SARKER 1405

A solution approach to the disassembly line balancing problem in the presence of task failures. A. GÜNGÖR and S. M. GUPTA... 1427

An optimal dwell point policy for automated storage/retrieval systems with uniformly distributed, rectangular racks. B. C. PARK 1469

Evolutionary adaptation of dispatching agents in heterarchical manufacturing systems. B. MAIONE and D. NASO 1481

Yield and control in a supplier–customer relationship. C. S. TAPIERO ... 1505

Integrated approach for assembly tolerance analysis. K. SRIKANTH, F. W. LIOU and S. N. BALAKRISHNAN 1517

An analogue genetic algorithm for solving job shop scheduling problems. L. AL-HAKIM 1537

A note on 'Efficient facility layout planning in a maximally planar graph model'. L. AL-HAKIM 1549

Announcement 1557

No. 8 20 May 2001

Green MRP: identifying the material and environmental impacts of production schedules. S. A. MELYNK, R. P. SROUFE, F. L. MONTABON and T. J. HINDS 1559

Optimum rectifying inspection plans. Z. WU, M. XIE and Z. WANG 1575

An approach to the measurement of single-machine flexibility. A.-Y. CHANG, D. J. WHITEHOUSE, S.-L. CHANG and Y.-C. HSIEH 1589

Finite capacity scheduling method for MRP with lot size restrictions. P. B. NAGENDRA and S. K. DAS 1603

Tolerancing for manufacturing: a three-dimensional model. F. VILLENEUVE, O. LEGOFF and Y. LANDON 1625

Branch and fathoming algorithms for operation sequencing in process planning. D.-H. Lee, D. Kiritsis and P. Xirouchakis 1649
Extended dynamic point specification approach to sequencing robot moves for PCB assembly. N. V. Hop and M. T. Tabucanon 1671
Multiple viewpoint models for automotive body-in-white design. P. Kugathasan and C. Mcmahon 1689
Performance modelling of serial production lines with inspection/repair stations. J. K. Cochran and R. Erol 1707
Linear sequencing for machine layouts by a modified simulated annealing. D.-S. Chen, Q. Wang and H.-C. Chen 1721
Configuration analysis to support product redesign for end-of-life disassembly. S. Viswanathan and V. Allada 1733
Production planning problem where products have alternative routings and bills-of-material. J. Miltenburg 1755
Two MILP models for the $N \times M$ SDST flowshop sequencing problem. F. T. Tseng and E. F. Stafford Jr 1777

No. 9 15 June 2001

Visual facility layout design system. W.-C. Chiang 1811
Reverse engineering of machining operation planning. X. Yan, K. Yamazaki and J. Liu 1837
A new grouping method to minimize surplus parts in selective assembly for complex assemblies. Sm. Kannan and V. Jayabalan 1851
Routing methods for warehouses with multiple cross aisles. K. J. Roodbergen and R. De Koster 1865
Using clustered assembly elements in the estimation of potential design for assembly benefits. J.-H. Wang and M. Trolio 1885
Optimizing the multiple constrained resources product mix problem using genetic algorithms. G. C. Onwubolu and M. Mutingi 1897
Isophote-based ruled surface approximation of free-form surfaces and its application in NC machining. Z. Han, D. C. H. Yang and J.-J. Chuang 1911
Economic design of $\bar{X}$ charts for non-normally correlated data. C.-Y. Chou, C.-H. Chen and H.-R. Liu 1931
Stage due date planning for multistage assembly systems. D. P. Song, C. F. Earl and C. Hicks 1943
Heuristic approach for assigning workers to tasks based on individual learning rates. D. A. Nembhard 1955
Collision-free planning for coordinate measurement machine probe. Z.-C. Lin and C.-C. Chen 1969
Distributed event-control for deadlock avoidance in automated manufacturing systems. M. P. Fanti, G. Maione and B. Turchiano 1993

A reverse logistics valuation method for inventory control. R. H. TEUNTER 2023
Integrated model for production planning in a large iron and steel manufacturing environment. H. LI and J. SHANG 2037
Note: General control charts for variables. H. SHORE 2063

No. 10 10 July 2001

Tabu search-based algorithm for the TOC product mix decision. G. C. ONWUBOLU 2065
Geometry-based machining precedence reasoning for feature-based process planning. Y. S. KIM, E. WANG and H. M. RHO 2077
Identification of the deviation from the mean and multimodal distribution in the automotive assembly process: correspondence analysis approach. S.-D. LEE and K.-Y. JANG 2105
Structured approach to the design of a production data analysis facility. Part 1: Conceptual design and information requirements. R. W. BAGSHAW and S. T. NEWMAN... 2121
Improving visual inspection using binocular rivalry. C. G. DRURY, G. MAHESWAR, A. DAS and M. G. HELANDER 2143
An agent-based production control framework for multiple-line collaborative manufacturing. T.-P. LU and Y. YIH... 2155
A bi-directional path layout for conflict-free routing of AGVs. L. QIU and W.-J. HSU 2177
Optimal operating parameters in high speed milling operations for aluminium. G. ABDOU and W. TERESHKOVICH 2197
Bootstrap sampling technique applied to the PCB golden fingers defect classification study. B. C. JIANG, Y. M. WANG and C. C. WANG 2215
Effect of organizational variables in JIT purchasing implementation. J. GONZÁLEZ-BENITO and I. SUÁREZ-GONZÁLEZ 2231
Design configuration for a closed-station, mixed-model assembly line: a filing cabinet manufacturing system. B. R. SARKER and H. PAN 2251
Book reviews 2271
Corrigenda 2273
Errata 2274
Technical note 2275
Announcement 2277

No. 11 20 July 2001

Flexible parts feeding for flexible assembly. N. F. EDMONDSON and A. H. REDFORD 2279

Labour flexibility and assignment policies in a job shop having incommensurable objectives. H. V. KHER and T. D. FRY 2295
Modelling for agile manufacturing systems. F. T. S. CHAN and J. ZHANG 2313
A continuous screening procedure using the performance and surrogate variables. S. H. HONG, M. K. LEE, H. M. KWON and S. B. KIM 2333
Experiments with a strategic oscillation algorithm for the pallet loading problem. A. R. S. AMARAL and M. WRIGHT 2341
Practice of manufacturing strategy: evidence from select Indian automobile companies. G. S. DANGAYACH and S. G. DESHMUKH 2353
Monte Carlo simulation of tolerance synthesis equations. L. LAPERRIÈRE and T. KABORE 2395
Structured approach to the design of a production data analysis facility. Part 2: Implementation and evaluation. S. T. NEWMAN and R. W. BAGSHAW 2407
Forming effective worker teams for cellular manufacturing. R. G. ASKIN and Y. HUANG 2431
A design methodology for the strategic assessment of a product's eco-efficiency. S. W. LYE, S. G. LEE and M. K. KHOO 2453
Synthesis of the measurement system on the machine tool. K.-D. KIM and S.-C. CHUNG 2475
Announcement 2499

No. 12 15 August 2001

Modelling functional design information for injection mould design. G. A. BRITTON, S. B. TOR, Y. C. LAM and Y.-M. DENG 2501
Dynamic control of continuous flow processes. A. J. D'SOUZA and W. G. FERRELL JR 2517
Neuron-based adaptive control algorithm for CNC positioning servo system. J. RUI-QUAN and C. JIAN-GUO 2535
Modular generic software system for cellular FMS. K. F. CHIU, L. K. CHU and D. SCULLI 2545
Optimal two-dimensional layout of industrial facilities. A. P. BARBOSA-PÓVOA, R. MATEUS and A. Q. NOVAIS 2567
Efficient cycle time–throughput curve generation using a fixed sample size procedure. J. W. FOWLER, S. PARK, G. T. MACKULAK and D. L. SHUNK 2595
Modelling empty vehicle traffic in AGVS design. M. E. JOHNSON 2615
Cyclic scheduling heuristics for a re-entrant job shop manufacturing environment. K. A. ALDAKHILALLAH and R. RAMESH 2635
On the frequency and location of set point adjustments in sequential tolerance control. R. G. MCGARVEY, E. A. LEHTIHET, E. DEL CASTILLO and T. M. CAVALIER 2659

Linking improvement models to manufacturing strategies—a methodology for SMEs and other enterprises. M. Barad and D. Gien 2675

Integrated scheduling and tool management in flexible manufacturing systems. M. S. Akturk and S. Ozkan 2697

A mathematical programming model for production planning using CONWIP. W. Zhang and M. Chen 2723

Sequencing CONWIP flow-shops: analysis and heuristics. J. M. Framinan, R. Ruiz-Usano and R. Leisten 2735

A note on 'Some models for understanding the cooperation between the supplier and the buyer'. S. K. Goyal 2751

Book review 2753

No. 13 10 September 2001

Group technology cell formation considering operation sequences and production volumes. Y. Won and K. C. Lee 2755

Combining process capability indices from a sequence of independent samples. N. F. Zhang 2769

Buyer behaviours and the performance of the supply chain: an international exploration. M. Pagell and C. Sheu 2783

Application of hierarchical production planning in a multiproduct, multimachine environment. M. M. Qiu, L. D. Fredendall and Z. Zhu ... 2803

A multi-attribute dispatching rule for automated guided vehicle systems. B. H. Jeong and S. U. Randhawa 2817

On the operational definition of processing time uncertainty. Q. Cao, J. W. Patterson and T. E. Griffin 2833

Managing flexible manufacturing technology: must parts in an FMS always move in a job-shop manner? H. C. Co 2851

Flexible fixture design and automation: Review, issues and future directions. Z. M. Bi and W. J. Zhang 2867

Developing a multivariate manufacturing company performance model: effects of technology and investment on two-dimensional firm performance. X. Li and D. J. Hamblin 2895

Graph-neural network approach in cellular manufacturing on the basis of a binary system. I. Mahdavi, O. P. Kaushal and M. Chandra 2913

Adaptive and dynamic process planning using neural networks. J. Joo, S. Park and H. Cho 2923

Simulation comparison of collaboration protocol-based testing models. C. Kwak and Y. Yih 2947

Estimating the rate at which a process goes out of control in a statistical process control context. D. P. Bischak and E. A. Silver 2957

Unified rough cutting tool path generation for sculptured surface machining. S. TAO and K.-L. TING 2973
A new approach for evaluation of risk priorities of failure modes in FMEA. F. FRANCESCHINI and M. GALETTO 2991
Balancing of U-type assembly systems using simulated annealing. E. EREL, I. SABUNCUOGLU and B. A. AKSU... 3003
Book review 3017
Calls for papers 3019

No. 14 20 September 2001

Agent-based multiple shop floor manufacturing scheduler. L. P. KHOO, S. G. LEE and X. F. YIN 3023
Multi-level heterogeneous worker flexibility in a Dual Resource Constrained (DRC) job-shop. J. T. FELAN and T. D. FRY 3041
Cash-flow-oriented buffer allocation in stochastic flow lines. S. HELBER 3061
Sequence-dependent batch chemical scheduling with earliness and tardiness penalties. K. E. MCGRAW and M. M. DESSOUKY 3085
Graph-based set-up planning and tolerance decomposition for computer-aided fixture design. Y. ZHANG, W. HU, Y. RONG and D. W. YEN ... 3109
Hotelling's T^2 control chart with variable sampling intervals. F. APARISI and C. L. HARO 3127
Routing-based reactive scheduling policies for machine failures in dynamic job shops. E. KUTANOGLU and I. SABUNCUOGLU 3141
Maximizing the net present value of a project with linear time-dependent cash flows. M. VANHOUCKE, E. DEMEULEMEESTER and W. HERROELEN 3159
Peak management. B. RONEN, A. COMAN and E. SCHRAGENHEIM 3183
Performance analysis of conjoined supply chains. B. M. BEAMON and V. C. P. CHEN 3195
Mixed integer programming for scheduling surface mount technology lines. T. SAWIK 3219
A longitudinal study of the impact of market requirements focus on manufacturing performance. C. BOZARTH and J. MCCREERY 3237
Applying fuzzy logic and constraint networks to a problem of manufacturing flexibility. M. ZUKIN and R. E. YOUNG 3253
A simple and effective heuristic for the resource constrained project scheduling problem. G. W. DEPUY and G. E. WHITEHOUSE 3275
Book review 3289

No. 15 15 October 2001

A bidding decision model in multiagent supply chain planning. HU Q., A. KUMAR and Z. SHUANG 3291

Optimizing cutting parameters in process planning of prismatic parts by using genetic algorithms. T. DERELI, I. H. FILIZ and A. BAYKASOGLU 3303

Algorithms for grouping machining operations and planning workpiece location under dynamic machining conditions. N. KAYA and F. ÖZTÜRK 3329

Automated Vision System for IC Lead Inspection. T.-H. HOU 3353

Mathematical model for determining machining parameters in multipass turning operations with constraints. A. M. A. AL-AHMARI 3367

Recognizing generalized pockets for optimizing machining time in process planning—Part 1. Z. YANG, A. JONEJA and S. ZHU 3377

Control chart pattern recognition using back propagation artificial neural networks. M. B. PERRY, J. K. SPOERRE and T. VELASCO 3399

Metaheuristics for the Stochastic Hoist Scheduling Problem (SHSP). G. FLEURY, M. GOURGAND and P. LACOMME 3419

Setting procurement safety lead-times for assembly systems. M. G. HEGEDUS and W. J. HOPP 3459

Adaptive crosshatch approach for the laminated object manufacturing (LOM) process. Y. S. LIAO and Y. Y. CHIU 3479

A cut-tree-based approach for clustering machine cells in the bidirectional linear flow layout. S.-D. LEE and C.-P. CHIANG 3491

FMS design model with multiple objectives using compromise programming. T. PARK, HOCHANG LEE and HEESEOK LEE 3513

Locating error analysis and tolerance assignment for computer-aided fixture design. Y. RONG, W. HU, Y. KANG, Y. ZHANG and D. W. YEN 3529

Minimizing the number of tool switches on a flexible machine: an empirical study. R. SHIRAZI and G. D. M. FRIZELLE 3547

No. 16 10 November 2001

A review of agile manufacturing systems. L. M. SANCHEZ and R. NAGI 3561

Recognizing generalized pockets for optimizing machining time in process planning—Part 2. Z. YANG, A. JONEJ and S. ZHU 3601

Assembly planning with an ordering genetic algorithm. P. DE LIT, P. LATINNE, B. REKIEK and A. DELCHAMBRE 3623

On the monitoring of trended and regularly adjusted processes. M. XIE, E. DEL CASTILLO, T. N. GOH and D. Q. CAI 3641

CF-GGA: a grouping genetic algorithm for the cell formation problem. E. C. BROWN and R. T. SUMICHRAST 3651

Performance analysis of an integral controller. G. VENKATESAN... 3671
MOAPPS 1.0: aggregate production planning using the multiple-objective tabu search. A. BAYKASOGLU 3685
Computer-aided fixture design system for comprehensive modular fixtures. J.-L. HOU and A. J. C. TRAPPEY 3703
Optimization of multipass turning operations with genetic algorithms. G. C. ONWUBOLU and T. KUMALO 3727
Heuristic scheduling of parallel machines with sequence-dependent set-up times. M. E. KURZ and R. G. ASKIN... 3747
Search heuristics for operation sequencing in process planning. D.-H. LEE, D. KIRITSIS and P. XIROUCHAKIS... 3771
Self-assessment of excellence. an application of the evidential reasoning approach. J. B. YANG, B. G. DALE and C. H. R. SIOW 3789
Contribution to the minimax evaluation of circularity error. J. HUANG and E. A. LEHTIHET 3813
Book review 3827

No. 17 20 November 2001

A WWW-based integrated product development platform for sheet metal parts intelligent concurrent design and manufacturing. S. Q. XIE, P. L. TU, D. AITCHISON, R. DUNLOP and Z. D. ZHOU... 3829
Integrated DNC: a case study. X. M. ZHANG, F. LIU, Q. LEI and B. DAN 3853
Real-time batch sequencing using arrival time control algorithm. J. HONG, V. PRABHU and R. WYSK 3863
Utilization of neural networks for the recognition of variance shifts in correlated manufacturing process parameters. D. F. COOK, C. W. ZOBEL and Q. J. NOTTINGHAM 3881
Optimization of the machining economics problem under the periodic control strategy. M. KASPI and D. SHABTAY 3889
An AGV routing policy reflecting the current and future state of semiconductor and LCD production lines. J. JANG, J. SUH and P. M. FERREIRA ... 3901
Improving the supply chain performance: use of forecasting models versus early order commitments. X. ZHAO, J. XIE and R. S. M. LAU... 3923
Multiconcept classification of diagnostic knowledge to manufacturing systems: analysis of incomplete data with continuous-valued attributes. L. P. KHOO and L. Y. ZHAI 3941
External partner selection using tabu search heuristics in distributed manufacturing. C. S. KO, T. KIM and H. HWANG 3959
International facilities location: a heuristic procedure for the dynamic uncapacitated problem. C. CANEL and B. M. KHUMAWALA 3975

Accounting for productivity losses in aggregate planning. C. J. Piper and S. Vachon 4001

Optimal dwell point location of automated guided vehicles to minimize mean response time in a loop layout. C. Lee and J. A. Ventura 4013

A probabilistic search method for sequential tolerance control. K. M. Scott, T. M. Cavalier and E. Amine Lehtihet 4033

Modelling a non-normal response for quality improvement. H. Shore ... 4049

Flexible optimization of machining variables using constrained R-T characteristic curve. Y. Chang and M.-W. Cho 4065

Process capability analysis for an entire product. K. S. Chen, M. L. Huang and R. K. Li 4077

No. 18 15 December 2001

Fuzzy approach to the robust facility layout in uncertain production environments. G. Aiello and M. Enea 4089

A multi-objective procedure for labour assignments and grouping in capacitated cell formation problems. N. C. Suresh and J. Slomp 4103

HPRODIE: using feature modelling and feature mapping to speed up progressive die design. Li C., Li J., Wen J. and Xiao X. 4133

Towards theory building in manufacturing flexibility. Ajay Das 4153

Improving productivity by using strategic inventories: theoretical issues and field results. A. Brandolese, E. Cartegni and R. Cigolini 4179

Concurrent analysis of machining sequences and fixturing set-ups for minimizing set-up changes for machining mill-turn parts. Yuan-Jye Tseng and Chia-Cheng Liu 4197

Tool selection in three-axis rough machining. M. Balasubramaniam, Y. Joshi, D. Engels, S. Sarma and Z. Shaikh 4215

Analysis of automated guided vehicle configurations in flexible manufacturing systems. B. E. Farling, C. T. Mosier and F. Mahmoodi 4239

Three perspectives for solving the job grouping problem. Timo Knuutila, Mikko Puranen, Mika Johnsson and Olli Nevalainen 4261

Wavelet-based approach for ball grid array (BGA) substrate conduct paths inspection. C.-H. Yeh and D.-M. Tsai 4281

Announcement 4301
